

Merlinus Anglicus Junior:

OR, THE
STARRY MESSENGER,^{10.}

For the YEAR of our Redemption, 1750.

Being the Second after

Bissextile, or Leap Year:

Wherein is contained,

- I. Astronomical, Astrological, and Meteorological Observations.
- II. The State of the Year deduced according to Art. from Solar Ingresses, Eclipses, various Configurations, Aspects and Conjunctions of the Seven Planets.
- III. The Rising, Southing, and Setting of the Moon, and High-Water at *London Bridge*.
- IV. Tables of the Rising, Southing, and Setting of the Seven Stars, and other Fixed Stars of Note: A perpetual Table of the Rising and Setting of the Sun, Beginning and Ending of Twilight, and Length of the Day and Night, to every fifth Day throughout the Year; with many other Tables pertinent for such a Work, all Accommodated to the Meridian of LONDON, whose Latitude is 51 Degrees, 32 Minutes North, but will serve for any Part of *Great-Britain* or *Ireland*. The like not Extant.

By HENRY COLEY, Student in the
Mathematicks and the *Cœlestial Science*.

I will behold the Heavens, even the Works of thy Fingers, the Moon and Stars which thou hast ordain'd. Psal. viii. 3.

LONDON: Printed by M. READ, for the
COMPANY of STATIONERS.

Flower-de-luce. R.

20

Last Year clo-
 sed with a Con-
 junction of *Jupi-*
ter and *Mars* in
 23 Degrees of
Pisces. And this
 Year begins with
 a favourable *Trine*
 of *Saturn* and
Mars, attended by
 a numerous Train
 of other mild and
 harmonious Af-
 fects; so that we
 find no Occasion
 at present to
 alarm Mankind
 with Fears and
 Terror; but can
 rather assure them,
 that the Beginning
 of this Year will
 be healthful; that
 Trade will flour-
 ish; and that pub-
 lick Affairs are
 friendly and hap-
 pily managed.

FEBRUARY hath XXVIII Days.

First Quarter, the 2d Day, at 1 in the Afternoon.

Full Moon, the 10th Day, at 7 in the Morning.

Last Quarter, the 18th Day, at 10 in the Morning.

New Moon, the 25th Day, at 7 in the Morning.

Last Month com-
 menced with a
 Trine of *Saturn*
 and *Mars*, this
 Month with a
 Trine of *Saturn*
 and *Jupiter*. The
 general Affairs of
 Europe tend to
 Peace and Quiet-
 nefs. Good News
 arrives to our wor-
 thy Merchants, and
 prosperous Returns
 from most Parts of
 the World. *Jupi-*
ter has left the
 Sign *Pisces*, and
 entered into *Aries*,
England's Sign,
 which directs I rof-
 perity to this hap-
 py Nation, and
 that his Majesty's
 Friendship is high-
 ly courted and ca-
 ressed by Foreign
 Powers.

M A R C H hath XXXI Days.

First Quarter, the 4th Day, at 1 in the Morning.
 Full Moon, the 12th Day, at 1 in the Morning.
 Last Quarter, the 19th Day, at Midnight.
 New Moon the 26th Day, at 4 in the Afternoon.

The Affairs of Europe seem to be upon the Balance, and many Princes and Powers therein very active. Saturn and Mars are now in Opposition from Sagittarius and Gemini. Spain, Sardinia, Lombardy, Hungary, and some other Places in the Eastern Parts of Europe, seem principally concerned; and no Wonder if we soon hear of some great Mutations and Alterations in some remote Kingdoms; of great Commotions, sharp Contentions, and high Disputes, arising from religious Pre-
ferences.

M A Y bath XXXI Days.

First Quarter, the 2d Day, at 5 in the Morn.
 Full Moon, the 10th Day, at 8 in the Morn.
 Last Quarter, the 17th Day, at 5 in the Afternoon
 New Moon, the 24th Day, at 9 in the Morn;
 First Quarter, the 31st Day, at 10 at Night.

Most Nations in Europe are now very busy; the Turkish Empire seem to be near to its final Period, their once prodigious Strength and Power is declining apace. The ☐ of ♀ and ♂ from 8 and ♄ shews great Confusion and Contradictions in those Places and Countries positive to its Effects some of which are, Turkey in Europe, Bohemia, Italy, and the City of Rome in particular, which are like to suffer Alterations in their Government and Religious Ceremonies. All which may be witnessed in Ireland.

August hath XXXI Days.

Full Moon the 6th day, at 4 in the afternoon.

Last Quarter the 13th day, at 8 in the morning.

New Moon the 20th day, at 8 at night.

First Quarter the 23th day, at Midnight.

				☉	☿	♂	♀	♂	♀	
1	12	0 M 42	9 A 10	2	17	□			△	Various News arrives about this Time from the North and Eastern Parts of the World, there is something about to break out that will carry a strange Consequent with it. This is like to be a Month of some Action, some still make it their Business to sow the Seeds of Division till Justice overtakes them to their Infamy. This Autumnal Quarter is like to prove sickly, I think an epidemic catarrhus Fever, and to some perhaps a Rheumatic Fever, attended with acute Pains.

October 1750.

Jupiter is now in Opposition to the Sun, and shines all Night ; Mercury is hid under the Sun-beams ; Saturn is Occidental and an Evening Star, but sets soon after the Sun ; Mars and Venus are Oriental and Morning Stars, and rises nearly together on the 6th Day, at 15 Minutes before 5 in the Morning ; at the End Venus rises at 6.

	C	Z	D rises and sets	Moon South.	Lunar Aspects.						Observations.
					☉	☿	♈	♉	♊	♋	
1	12		2M 30	9A 42		17				Δ	We are not yet to expect a Completion of our wish'd - for Happiness, or that the Peace of Europe will be settled to the Satisfaction of every contending Party ; no, a Jealousy and Distrust still takes Place, and it seems as if greater Mischiefs were preparing. The ☉, ♀ and ♄ all come to the ♈ of ♈ this Month, and in the next Month ♂ comes to his ♈ also. This gives great Suspicion of Religious Disputes to the Hurt of many, but this will mostly affect Rome, and the Italian Territories.

Saturn, Mars and Venus are now all Oriental and Morning Stars ; Mars rises soon after 4 in the Morning, Saturn rises at 6 in the Morning, and Venus rises about half an Hour before the Sun ; Jupiter is Occidental, and sets at 3 in the Morning the beginning of this Month, and at 1 in the Morning towards the End. Mercury is combust.

O	Z	rises and sets	Moon South.	Lunar Aspects.						Observations.
				☉	☿	♂	♀	♂	♀	
1	12	D rises	11 A 42	8	19			8	8	Some glimmering Hopes appears of bettering our Mis- fortunes, and con- verting our Fears in- to more peaceful and blessed Days. Here are no hostile Rays this Month, but all appear friend- ly and pacific. The Δ of the ☉ and ♃, of ♃ and ♀, also of ♃ and ♁, inti- mates a good Un- derstanding between Prince and People, that they shall be in a good State, shall enjoy Justice, Secu- rity, and other va- luable Blessings: Let us not be dismayed, the Heavens give us Encouragement.

A TABLE of some principal fix'd Stars, with the Time they rise, south, and set, either before or after the seven Stars; as also their Colour, Magnitude, and meridian Altitude, by which they may be readily discover'd.

Co- lour.	Mag.	Alt.	Names of the Stars	Rise.		South.		Sets.	
				H.	M.	H.	M.	H.	M.
♂	1	53	<i>Aldebaran, or Bull's Eye</i>	1	a 34	0	a 48	0	b 0
♂	1	29	<i>Left Foot of Orion</i>	4	31	1	31	1	34
♂	2	36	<i>Middle * in Orion's Belt</i>	4	13	1	51	0	35
♂	1	45	<i>Right Shoulder of Orion</i>	3	23	2	8	0	8
♂	1	21	<i>Sirius, the great Dog</i>	6	51	3	1	0	48
♂	2	43	<i>Procyon, the little Dog</i>	5	33	3	53	2	a 7
♂	1	30	<i>Heart of Hydra</i>	8	39	5	41	2	44
♂	1	51	<i>Regulus, Lion's Heart</i>	7	26	6	21	5	16
♂	1	54	<i>Deneb, the Lion's Tail</i>	8	42	7	54	7	7
♂	1	28	<i>Virgin's Spike</i>	12	46	9	38	6	36
♂	1	58	<i>Arcturus</i>	10	47	10	30	10	12
♂	1	12	<i>Antares, Scorpion's Heart</i>	17	36	12	39	7	42
♂	2	46	<i>Bright Star of the Vulture</i>	17	38	16	3	9	b 27
♂	1	6	<i>Fomahant</i>	1	14	19	11	10	37
♂	2	65	<i>Head of Andromeda</i>	19	43	20	19	2	56

THE brightest of the seven Stars is of the third Magnitude, and hath 61 Degrees of meridian Altitude, and in Colour participates of the Moon and Mercury.

2. The fix'd Stars all rise, south, and set about four Minutes sooner every Night, than they did the Night before. This consider'd, the exact Time of their rising, southing, and setting, for any intermediate Night, not herein noted, may be very easily deduced from this Table, by Inspection only.

To know the Time of the rising, southing, and setting of any Star in this Table, for any Day requir'd, it is but considering how many Hours and Minutes that Star rises, souths, or sets, either before or after the seven Stars, on that Day, and you shall have your Desire; observing, that in this Table *a* stands for *after*, and *b* for *before*.

I. Come see the Works of God: he is terrible in his Doings towards the Children of Men. Pl. 66. 5.

THOSE that are the greatest Observers of Nature's Productions, are the most inquisitive into the Cause of Things; but the Infection which has so long raged among the Horned Cattle amazes most People; for not knowing the proper Causes of the Distemper, all Applications and Remedies have failed in the Cure: Ignorance in the Causes must needs produce anomalous Effects. As several Queries have been made, in reference to these Causes, and various have been assign'd, but none of them seems to have hit the Mark: I have therefore looked into History, for the Times when the like fatal Maladies have before happened, to see if from thence any Thing may be discovered, that will give Light into the true Cause of such dreadful Distempers.

Anno Domini, 1111, There was a great Dearth, and Mortality of People, a grievous Murrain of Cattle, and Death of Fowls, and even Fishes died in the Water. On the fifth of May, the Year before this, there was a great and total Eclipse of the Moon; and about the latter End of June a Comet arose out of the East, and ascended up towards the Zenith, when it became Retrograde in Motion, and continued visible for three Weeks: Comets were frequent some Years before this. In the Month of February 1106, a Comet was visible in the Evening for 25 Days, and in Judea it was seen for 50 Days decreasing. And A. D. 1107, was seen in the East a black Comet for 40 Days together, which had a long Tail. A. D. 1108, was seen another Comet. And in December 1109, a Comet appeared in the Milky Way, moving Southwards. In 1110 was the great Eclipse and Comet abovemention'd, in which Year the River Trent was dry at Nottingham for 24 Hours, an Earthquake and Tempests pernicious to Corn, and destructive of all Fruits. The People over all England were afflicted with sore Diseases, especially an Erysipelas, whereof many died, the Parts being black and shrivelled up.

A. D. 1125, Is recorded for its excessive Rains the whole Summer, and on the 10th of August was so prodigious a Flood, as drowned many Towns, and much People; it carried

Coley, 1750.

ried down Bridges, destroyed Corn and Meadows; hence a terrible Famine accompanied with a great Plague on Man, and Murrain on Beasts, so as in Towns, Villages, and High Ways, dead Bodies lay unburied. The Year before this, there was a great Eclipse of the Sun; and about this Time Comets appeared with an unwonted Frequency, almost every Year one for some Years preceding. It would fill a Volume to speak particularly and fully concerning the Miseries of those doleful Times, Earthquakes, Inundations, Famine and Plague, raged throughout almost the whole Earth; but the most remarkable and great Concern attending these reiterated blazing Stars, was the Holy War as it was then called, which lasted for many Years, and proved most unhappy to the Christian World.

A. D. 1317, was a great Murrain of Cattle, in the South Parts of *England*, which the next Year reached the North, and overspread the whole Realm, Dogs and Ravens which eat the Flesh of the infected Cattle were poisoned, swelled and died. This Year and the following was fatal to People also, so that the Survivors were not sufficient to plow and sow the Land. A few Years preceding these terrible Mischiefs, several Comets made their Appearance. In 1313 a great Comet was seen in the North for 14 Days, having its Motion towards the South. The next Year after, a Comet was seen blazing in *Virgo*, for six Months together; and in the Year after that another blazing Star appeared in *December*, for a Month. The Year 1315 was attended with two Comets, one in the Arctic Circle, the other near unto the Planet *Mars*, and in this Year was so terrible a Famine that Parents did not abstain from devouring their own Children, and the most filthiest of Creatures.

A. D. 1598 and 1559, There being an Universal Pestilence which unmercifully consumed the Cattle of *Germany*, the Arch Duke *Matthias*, commanded the College of Physicians in *Vienna*, to shew the Cause thereof: The Physicians return'd their Answer; that there were two Causes, one Astrological, but the more remote; the other Physical, and the immediate Cause. They said the Astrological Cause was, because in the Year 1597 there was a Comet seen in *Taurus*, and there were also many Conjunctions of the Planets in ruminating Signs, (ruminating Signs are ♋. ♊. ♎.) The Physical Reason the College gave was, That there had pre-

Coley, 1750.

ded a cloudy Constitution of Heaven, and the Earth very moist, by reason of Inundation of Waters; whereby the Pastures were infected with Surplusage of Moisture, and the Air made contagious with the Death of the dead Cattle: Was ever any Man such a Blockhead (says my Author) that perceives not the latter Reason to be a common one? Thence it would have proceeded that not only Oxen, but Hogs, Sheep and Horses, must have perished with the Infection. The true Cause therefore, saith he, after God is no other, than that which is drawn from the Aspects of the Planets, and Constellations of Heaven. What that Comet was, which appeared in 1597 I cannot say, having seen no good Account of it; but *A. D. 1596, July the 9th*, a Comet of a Saturnine Aspect appeared in *Ursa Major*, from whence it hastened to *Coma Berenices*: It passed through *Cancer, Leo, and Virgo*, where it became stationary and disappeared. In this and the following Year, there was great Dearth and Famine in *England*, and other Parts of *Europe*, occasioned by prodigious Rains.

All Christians must acknowledge the primary Cause of every Calamity to be Almighty God blessed for ever, who is pleased to suffer such dreadful Mortalities, as a Punishment of the Sins of Mankind; yet usually he distributes his Justice by natural Means, as by Comets, great Conjunctions, Eclipses, and the malevolent Influence of Stars, tho' some are so stupid as to deny all Influences of these, but (as *Dr. Fuller* says) such as deny all Influence of Stars in Nature and Men's Minds, shew therein that the Moon hath made too much Impression on their crazy Judgments and Lunatick Opinions.

A. D. 1714, About the Middle of *July* began a contagious Disease among the Horned Cattle near *London*, and spread into several other Parts of the South Country, and raged till the Middle of *October*, or longer, in *Essex, Middlesex, and Surry*; 5857 Cattle died in three Months time, and in *Holland* it raged two or three Years, and killed three hundred thousand Cows, Oxen and Bulls. This was a very dry Year in *England*, and very sickly and mortal. In *January* was an Opposition of *Saturn* and *Jupiter*, also an Opposition of *Saturn* and *Mars*, *Saturn* being retrograde in Motion, in the first Decade of *Virgo*, and in *February Jupiter* and *Mars* came to a Conjunction, in 20 Degrees of *Pisces*.

The

Coley, 1750.

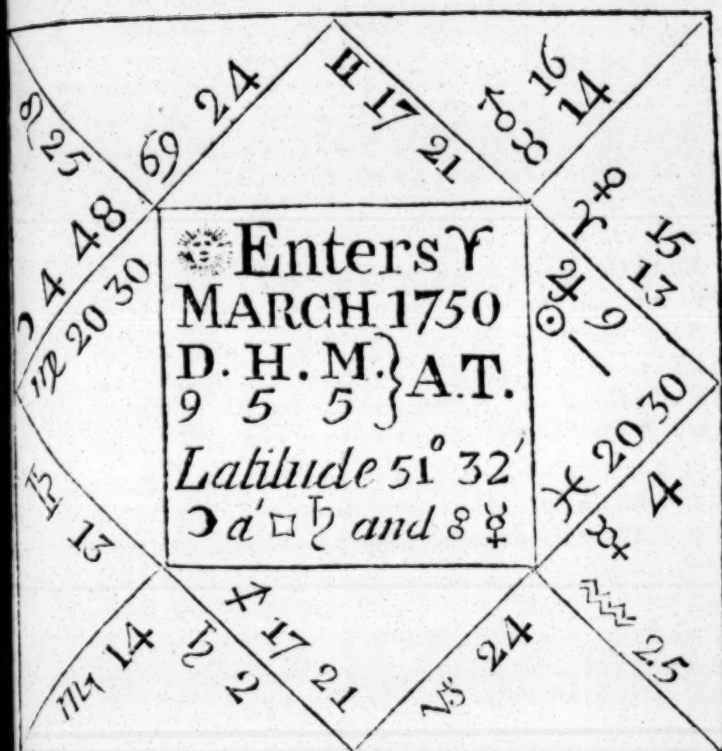

The present contagious Distemper which still rages among the Horned Cattle, was brought into *England* about the Middle of the Year 1745, it having been in *Holland* and *Denmark* some Time before, where it had made dreadful Havock. In *May* this Year there was a Conjunction of *Saturn* and *Mars* in *Virgo*, and in *August* a Conjunction of *Jupiter* and *Mars* in the Beginning of *Scorpio*; in *August* 1742 was a remarkable Conjunction of *Saturn* and *Jupiter* in *Leo*, and at the Beginning of the Year 1744 a Comet appeared very bright with a long Tail. If these Years have been more favourable to the Health of Mankind than some others under the same Celestial Phenomena, let us be thankful to Heaven, that God in Mercy seems to overlook our Sanguine Crimes, by withholding his Scourge from us.

II. *Observations upon the Influences of the Planets at the Times of the Sun's apparent Ingress into the Equinoctial and Tropical Signs, this present Year 1750.*

Of the SPRING QUARTER.

THIS Quarter begins on *Friday* the 9th Day of *March* 5 Minutes past 5 in the Afternoon; when 20 Degrees of *Virgo* ascends, and 17 Degrees of *Gemini* is on the Mid-heaven. The Moon is in 5 Degrees of *Virgo*, and in the 12th House, departing from the Square of *Saturn*, and Opposition of *Mercury*, and applying to the Trine of *Mars*. And the rest of the Planets disposed as in the following Figure, or Representation of the Heavens at the Time of this Ingress; in which we observe, that *Mercury* the Disposer of the Moon, and Lord of both the Ascendant and Medium Celi, is not only in Opposition of the Moon and Square of *Saturn*, but is also in his Fall and Detriment, and under the Earth; intimating thereby to us Mortals, much Treachery and Falshood, many Difficulties and Misunderstandings in the Leagues and Friendships of great Princes, strange and unusual Jealousies, Contentions, Malice and Impeachments, whereby many are degraded from their Honours, Profits, and Dignities.

Coley, 1750.

Dignities: But the Sun and Saturn are in Trine to each other, and the Moon strongly applying to the Trine of Mars. These noble Aspects indeed, intimates the generous Endeavours of some Great and Noble Men to restore Peace and good Understanding between contending Parties, by qualifying such Treaties, Laws and Constitutions, as have given Offence. And I also observe as Saturn is Retrograde in Motion, and Mars Direct, they thereby hasten to an Opposition, which they compleat before the End of this Month. We shall from thence know, that the general Affairs of Kingdoms and Nations have a strong Dependency and Connection with second Causes; very few Calamities there are afflicting the City or People generally, which have not relation to some present Configuration of Heaven. But of this Aspect I shall say something farther in the succeeding Quarter.

of

Coley, 1750.

Of the SUMMER QUARTER.

THIS Quarter begins on *Sunday* the 10th Day of *June* at 4 in the Afternoon, when 12 Degrees of *Scorpio* ascends, and 14 Degrees of *Taurus* culminates. The Moon is in 22 Degrees of *Capricorn*, departing from the Opposition of *Mars* and *Mercury*. and applying to the Square of *Jupiter*; *Saturn* is Retrograde in the Ascendant, in 27 Degrees of the Sign *Scorpio*, in Opposition to *Venus* in the 7th House; *Jupiter* is just upon leaving the Sign *Aries*, and entering into the Sign *Taurus*, in which he becomes Retrograde about the Middle of *August*, and re-enters *Aries* again about the 21st Day of *October*. There seems to be great and extraordinary Affairs upon the Carpet this Summer Quarter, and no doubt but this will be a Year remarkable for many strange Actions and Events, that will be produced therein, in almost every Nation in *Europe*. *Mars* infests the Cusp of the ninth House, both in this and the first Quarterly Ingress, which looks as if some mighty Controversies would arise about Religious Matters; we may also about this Time expect to feel something of the Effects of the late ♂ of I_2 and ♂ , mention'd in the last Quarter: This Opposition is made from I and II , and bodes no Good I fear to the Twin City. All Authors account this an Aspect of sad Import.

Of the AUTUMNAL QUARTER.

THIS Quarter begins on *Wednesday* the 12th Day of *September*, at 18 Minutes past five in the Morning, when 22 Degrees of *Virgo* ascends, and 20 Degrees of *Gemini* on the Medium Celi. The Moon is in 7 Degrees of *Cancer*, departing from the Sextile of *Jupiter*, and applying to the Sextile of *Mars*. It is an Axiom in Astrology, that peaceable and harmonious Ingresses, are always attended with happy and harmonious Actions and Accidents; and we hope to find this Axiom true at this Time, so far as it can be expected to exert its Force. We have for some Time been labouring under Positions less favourable to humane Happiness, and we must not expect that the Heats and Passions of Mankind will as yet totally subside, the Opposition of *Saturn* and *Mars* having not yet finished their Errand.

Coley, 1750.

Of the WINTER QUARTER.

THIS Quarter begins on Monday the 10th Day of December, 47 Minutes after 8 at Night, when 26 Degrees of *Leo* ascends, and 14 Degrees of *Taurus* is on the Midheaven; the Moon is in 13 Degrees of *Libra*, departing from the Sextile of *Saturn*, and applying to the Sextile of *Venus*, and all the Planets under the Earth except *Jupiter*. The Aspects and Positions at the Time of this Ingress, are of no great Importance; some Mistakes are in a fair Way of Reconciliation; the Heavens smile on our National Affairs; and promise Success to her Trade; a Peace or seeming Quietness reigns amongst us, and in general all over *Europe*.

III. Of the Eclipses this Year, 1750.

FIVE Eclipses, and but two of them visible in *England*, and they both of the Moon, and total.

The First is on *Friday, June 8*, beginning 10 Minutes past 7 at Night; Beginning of total Darkness 17 Minutes past 8. End of total Darkness 41 Minutes past 9, and the End of the whole Eclipse 48 Minutes past 10 at Night. Digits Eclipsed 16.

The second is an invisible Eclipse of the the Sun, *June 22*.

The third is another invisible Eclipse of the Sun, on the 18th Day of *November* at 1 in the Morning.

The fourth is a Total, and in Part Visible Eclipse of the Moon, on *Sunday* the 2d Day of *December*, in the Evening, beginning 37 Minutes past 4: Beginning of total Darkness 35 Minutes past 5, End of total Darkness 15 Minutes past 7, and the End of the whole Eclipse, 13 Minutes past 8 at Night. Digits eclipsed 21.

The fifth and last is an invisible Eclipse of the Sun, on the 17th Day of *December*, at 7 at Night.

F I N I S.

(Now published,) The EIGHTH EDITION,
Beautifully printed, Price 1s 6d

The TRUE AMAZONS;
OR, THE
MONARCHY of BEES:

BEING a new Discovery and Improvement of those wonderful Creatures. Also the Art of making English Wine or Mead.

By JOSEPH WARDER, of Croydon, Physician.

Printed for T. Longman and T. Astley, and sold by R. Baldwin, Jun. at the Rose in Pater-noster Row, and all Country Booksellers and Stationers.
Of whom may be had, Price 1s

The Practical Farrier; or, full Instructions for Country Gentlemen, Farmers, Graziers, Farriers, Carriers, Sportsmen, &c. Being a very curious Collection of well-experienced Receipts for the cure of the most common Distempers incident to Horses, Oxen, Cows, Calves, Sheep, Lambs, Hogs and Dogs; digested under their proper Heads: Many of which have been practised several Years with great Success, and the rest taken from the latest and most approved Authors, viz. Capt. Burdon, Mr. Solleyfell, Mr. Gibson, Mr. Mascall, Mr. Fitzherbert and others. By a Society of Country Gentlemen, Farmers, Graziers, Sportsmen, &c. The third Edition, with the Addition of several curious Receipts. Also a short Account of Moles, with different Methods of destroying them. Printed on the same Size as Capt. Burdon's Pocket Farrier. And as it contains several curious Receipts for the cure of chronical Diseases incident to Horses, is very proper to bind with it.

The Practical Farmer: Or, *Hertfordshire Husbandman*. Containing many new Improvements in Husbandry. By WILLIAM ELLIS, of *Little Gaddesden in Hertfordshire*.

Printed for T. Astley, and sold by R. Baldwin, jun. at the Rose in Pater-noster-Row. *Of whom may be had,*

1. The Practical Farmer. Part II. The 2d Edition.
2. The Landlord's Companion: Or, Ways and Means to raise the Value of Land. By W. ALLEN, of *Fobston in Pembrokehire*, Esq;
3. Mr. Switzer's Compendious Method of Raising *Italian Broccoli*, and other Foreign Kitchen Vegetables, and an Account of the Lucerne, and other Grass Seeds; with the Method of burning Clay for the Improvement of Land.

N. B. These Pamphlets are all Printed in 8vo, and may be had bound together.

Artificial Teeth set in so firm, as to eat with them, and so exact, as not to be distinguish'd from Natural: They are not to be taken out by Night, as is by some falsely suggested, but may be worn Years together; yet they are so fitted, that they may be taken out and put in by the Person that wears them at Pleasure, and are an Ornament to the Mouth, and greatly help the Speech. Also Teeth are clean'd and drawn by *Samuel Rutter* and *William Green*, Operators, who apply themselves wholly to the said Business, and live in *Racquet-Court, Fleet-Street, London*.
